

DET Supplemental Document

## **FB4-3 Radar Sensor**

# Condition

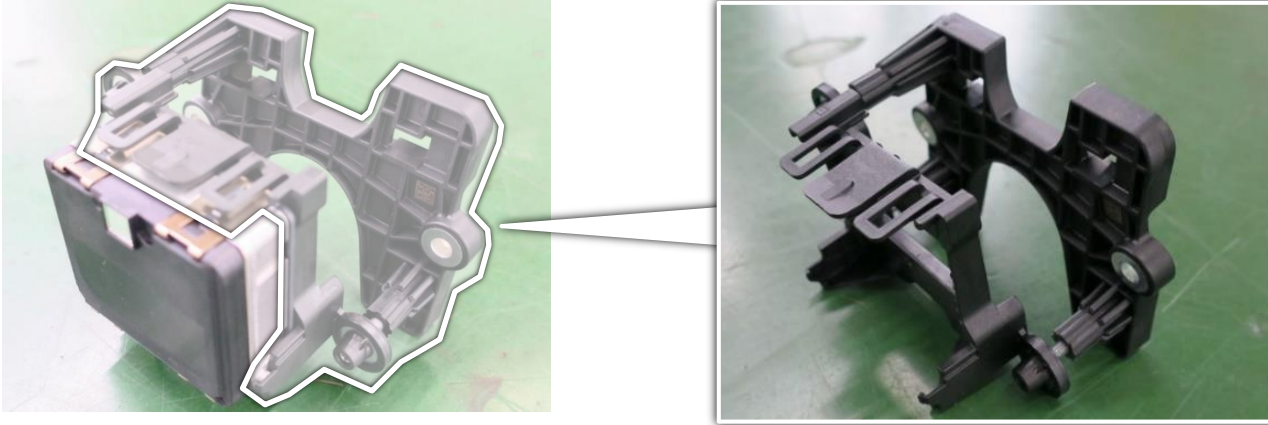

- Vehicle : Vehicles on which a bracket is used to install Front Radar Sensor
- Part and Structure : Bracket of Radar Sensor

☞ A vehicle without a bracket that can be separated from the Radar Sensor is not the subject of this evaluation.

# Criteria

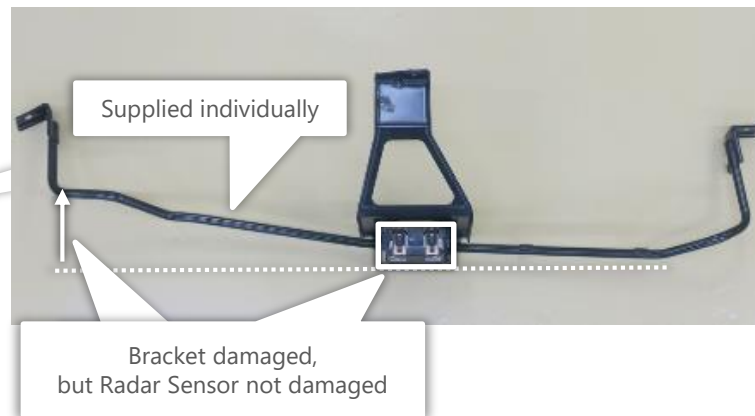

The bracket of the Radar Sensor should be supplied individually.

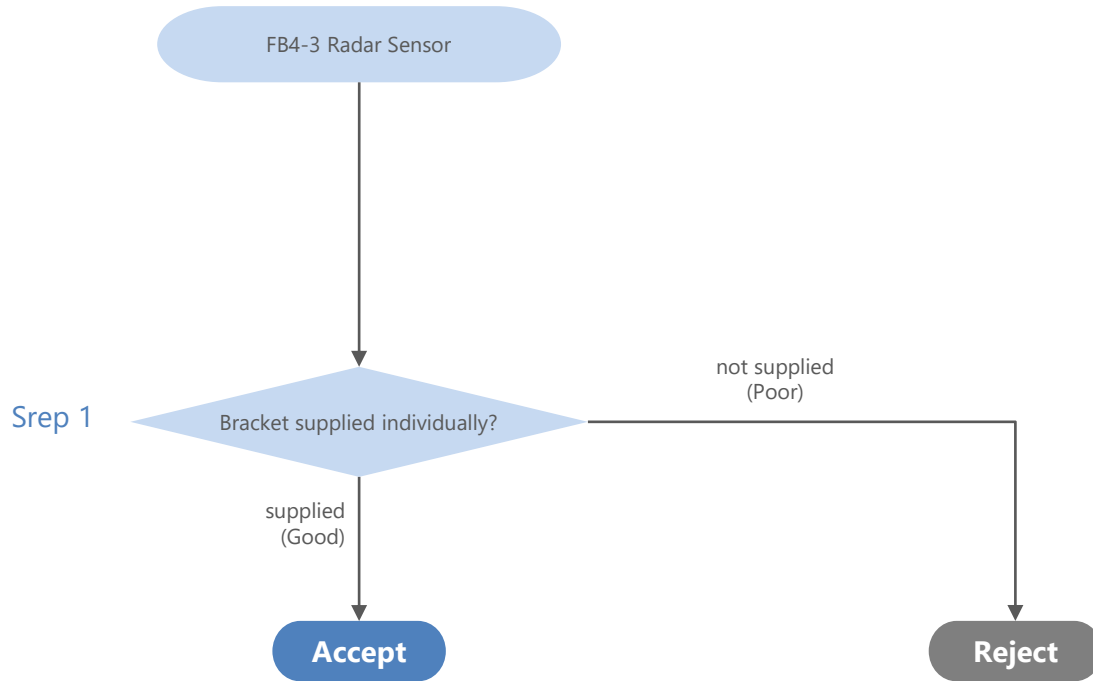

# Reason

When the bracket is supplied individually, if only the bracket is damaged, replacing only the bracket can be possible.

Example of a bracket which is supplied individually

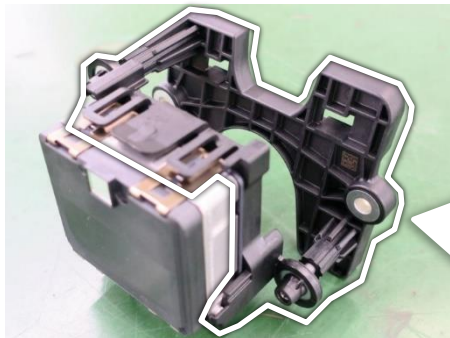

# Check Flow

# Check – Step 1

Check if the bracket of the Radar Sensor is supplied individually.

Bracket supplied individually

Bracket not supplied individually

## 【Determination】

### Good

- ☞ Check a parts list and so on, when the bracket is supplied individually, it is determined as Good and **Accept**

### Poor

- ☞ When the bracket is not supplied individually, it is determined as Poor and **Reject**
